

Manufacturers, importers and online vendors have to pay mandatory levies for IT- and CE-devices and storage media. 1cc GmbH supports market participants' compliance with copyright levy obligations. A levy on the sales price of a product can affect a company's competitiveness and success. For this reason, managing copyright levies correctly can be a key factor for global scale effectiveness and avoiding lawsuits or penalties.

Nevertheless, assessing copyright obligations is an ongoing arduous task. Every day new devices are levied, tariffs are modified, and administrative rules are adapted. In addition, the copyright system in each country varies on reporting methods, refunds and exemptions, invoice requirements, etc.

Are you obligated to pay copyright fees?

Experienced consultants advise ...

1cc fully supports you by providing:
