

Staying abreast of developments in environmental legislation worldwide is at the core of 1cc's monitoring services.

OUR MONITORING SERVICES ENCOMPASS REGULATORY UPDATES IN THE FIELDS OF

Waste/EOL:
WEEE, batteries,
packaging, ELV

Energy:
energy efficiency,
energy labelling,
eco design,
material efficiency,
carbon footprint

Chemicals:
REACH, RoHS,
biocides,
nanomaterials,
ozone depleting
substances,
persistent organic
pollutants

Others:
GPP,
plastic packaging,
conflict minerals,
modern slavery,
circular economy,
and copyright levies

We help monitor your producer/distributor responsibilities in a region, or particular country for any, or a combination of the regulatory fields in our core business.

YOUR ADDED VALUE

- A decade of experience in the field of regulatory monitoring
- Highly qualified, native speaking country-experts
- Established network of contacts with local authorities worldwide
- Implemented quality management and process systems
- Internal coordination of customer-regulatory issues with legal- and fulfillment teams

WE DELIVER RESULTS IN THE FORM OF

ALERTS

- ❖ Within a timeline suitable to you
- ❖ In the form of a written notification sent to you, summarizing the principal aspects of the legislation

REPORTS

- ❖ Format and volume of information according to customers' needs
- ❖ Contain analysis of legislation, including customer impact assessment if desired
